COVID-19 and Biologic Therapies: Dermatology and Rheumatology Clinical Perspectives

Global Dermatology and Rheumatology Scientific Webcast

Prof. Mark Lebwohl, Chair
Mount Sinai School of Medicine,
NY, USA

Prof. Kristian Reich
University Medical Center
Hamburg-Eppendorf, Germany

Prof. Iain McInnes
University of Glasgow, UK

Prof. Richard Langley
Dalhousie University
Halifax, NS, CA

Prof. Atul Deodhar
Oregon Health & Science
University, Portland, OR, USA

Educational objectives

- Briefly discuss what we know so far about COVID-19
- Share dermatologists' and rheumatologists' clinical perspectives to date with COVID-19 and their patients with psoriasis, psoriatic arthritis, and ankylosing spondylitis on immunomodulatory therapies
- Review the data available for dermatology and rheumatology treatments with regards to risk of infection associated with immunosuppressive/immunomodulatory therapies, and what medical societies currently advise

During these unprecedented times, it is essential that we continue to stay connected with our peers and share experiences from across the globe. For this reason, we invite you to watch this Global Scientific Webcast. The recording is now available to view on the registration site.
